

Pro-Tech Parts and Options Overview

PRO-TECH STANDARD PARTS

The best in the industry

Wear Shoes

- Extremely wear resistant
- Hardened AR plate; industry standard
- Provides long life

Rubber

- Formulated specially for Sno Pusher use
- Flexible, resilient
- Excellent squeegee characteristics
- Provides long life

Make sure you use Pro-Tech hardware for all shoes & rubber

PRO-TECH PREMIUM UPGRADE PARTS

Super Duty Shoe

- Made with the hardest AR plate in the industry
- Provides the highest wear characteristics and longest life
- Over 4 times the life of any other wear shoe

UHMW Shoe

- This shoe has a UHMW, or polyurethane, pad bolted on to the bottom of it
- Great in applications where a steel bottomed shoe will damage your plowing surface

Extended or Self Leveling Shoe

- This shoe style extends off the back end of the Pusher by 16"
- Keeps the pusher level and balanced, creating an even amount of pressure throughout the whole length of the shoe
- This eliminates excess down pressure on the back of the shoe
- Increased surface area actually increases the lifespan of the shoe

PRO-TECH SNO PUSHER OPTIONS

Level Gauge

- This handy tool attaches to the Sno Pusher and lets the operator know that the unit is level, to optimize snow removal
- Save dollars on wear shoe replacement by avoiding uneven wear on Sno Pushers

Unit level

Binder Kits

- Come with heavy duty transport chain, hooks, binders
- Quick attach system with binder kit safer than a direct connect. Sudden impact to a Sno Pusher will break binder kit chain, instead of loader arms on a direct connection
